

216	VFP6 - VB6 Concordance	
<i>Back by popular demand; look for the VFP8 - VB .NET Concordance on this site soon...</i>	! command	SHELL
	#DEFINE...#UNDEF	No equivalent
	#IF...#ENDIF	Same
	#IFDEF...#ENDIF	No equivalent
	#INCLUDE	No equivalent
	\$ operator	InStr
	% operator	Mod()
	& macro expansion	No equivalent
	&& inline comment prefix	' (single quote)
	* Comment prefix	' (single quote)
	+ (string concatenation>	&
	; (line continuation)	_ (underscore)
	.ResetToDefault() to return to default	ReadProperty
	= (to execute a function) - no longer required	Not required
	? ?? print command	Printer object Print, NewPage methods
	??? send directly to printer	No equivalent
	@ commands (screen output)	Use label objects
	ABS()	Same
	ACCEPT	InputBox() (Sort of...)
	AClass()	No equivalent
	ACOPY()	No equivalent
	ACOS()	Same
	ACTIVATE MENU	No equivalent
	ACTIVATE POPUP	No equivalent
	ACTIVATE SCREEN	WindowName.Show
	ACTIVATE WINDOW	AppActivate
	ADATABASES()	No equivalent
	ADBOBJECTS()	Traverse database obj and enumerate
	ADD CLASS	No equivalent
	ADD TABLE	No equivalent
	ADEL()	No equivalent
	ADIR()	No equivalent

AELEMENT()	No equivalent
AERROR()	No equivalent
AFIELDS()	No equivalent
AFONT()	No equivalent
AINS()	No equivalent
AINSTANCE()	No equivalent
ALEN()	UBound()
ALIAS()	No equivalent
AllowAddNew grid property	Depends on the grid
ALLTRIM()	Trim()
ALTER TABLE - SQL	PST only
AMEMBERS()	No equivalent
ANSITOOEM()	No equivalent
APPEND	AddNew of RecordSet object
APPEND FROM	No equivalent
APPEND FROM ARRAY	No equivalent
APPEND GENERAL	AppendChunk
APPEND MEMO	AppendChunk
APPEND PROCEDURES	No equivalent
APRINTERS()	No equivalent
ASC()	Same
ASCAN()	No equivalent
ASELOBJ()	No equivalent
ASIN()	Same
ASORT()	No equivalent - IN FORMS, USE AN INVISIE
ASSERT	Debug.Assert
ASUBSCRIPT()	No equivalent
AT()	InStr()
ATAN()	Same
ATC()	Instr()
ATCC(), AT_C()	Double-byte (Unicode) string searches
ATCLINE()	No equivalent
ATLINE()	No equivalent
AT_C()	InStrB()
AUSED()	No equivalent

AVERAGE	No equivalent
BAR(),BARCOUNT (),BARPROMPT()	Not needed: VB menu items have events,
BEGIN TRANSACTION	Method belongs to Data object
BEGIN...END TRANSACTION in DBC	Transactions use Repository
BETWEEN()	Same command, different syntax
BIT functions	No equivalent
BITAND()	Imp - implication operator
BLANK	No equivalent
BOF()	BOF property of recordset
BROWSE	No equivalent - use form with grid
BUILD EXE FROM	object.MakeCompiledFile or File, Make
BUILD EXE, DLL, APP	VB Menu selections
CALCULATE	No equivalent
CALL	Same
CANCEL	End
CANDIDATE()	No equivalent - handled by RS object
CAPSLOCK()	Use SendKeys() to set
CD	CHDIR
CDOW()	Instr(Format(now)) to find day name
CDX()	No equivalent - handled by RS object
CEILING()	No equivalent
CHANGE	No equivalent - build a form instead
CHR()	CHR\$()
Class Browser (select from IDE menu)	Repository Browser (select from IDE menu)
CLEAR EVENTS	End
CLOSE TABLES ALL	RecordSet.Close for each open RecordSet
CLOSE DATABASE	Use Database.Close
CLOSE MEMO	No equivalent
CMONTH()	INSTR(FORMAT(now)) to find month name
CNTBAR()	Not needed: VB menu items have events,
	Not needed: VB menu items have

CNTPAD()	events,
COL()	No equivalent
ComboBox control - syntax differences	DBCCombo control
CommandButton in Toolbar	Button object
COMPILE	IDE menu selection
Constant declarations not needed	Const declarations
Constants in FOXPRO.H	Constants - 22 lists in HELP
COPY FILE	No equivalent
COPY INDEXES	No equivalent
COPY MEMO	No equivalent
COPY PROCEDURES	No equivalent
COPY STRUCTURE	No equivalent
COPY TAG	No equivalent
COPY TO	No equivalent
COPY TO ARRAY	No equivalent
COS()	Same
COUNT	No equivalent
CPCONVERT()	No equivalent
CPCURRENT()	No equivalent
CPDBF()	No equivalent
CREATE (a table interactively)	Use VisData or Access
CREATE CLASS	IDE menu selection
CREATE CLASSLIB	No equivalent
CREATE CONNECTION	Data Object Method
CREATE CURSOR	Data Object Method
CREATE DATABASE	Data Object Method
CREATE FORM	IDE menu selection
CREATE FROM	Data Object Method
Create indexes, other features	CONSTRAINT clause of ALTER
CREATE LABEL	IDE menu selection
CREATE MENU	IDE menu selection
CREATE PROJECT	IDE menu selection
CREATE QUERY	Data Object CreateQueryDef Method
CREATE REPORT	IDE menu selection
CREATE SCREEN	IDE - Form Wizard

CREATE SQL VIEW	Data Object CreateQueryDef Method
CREATE TABLE - SQL	Data Object CreateTable Method
CREATE TRIGGER	Data Object CreateProcedure Method
CREATEBINARY()	CharToBinary()
CreateObject - classes or OCXs	CreateObject - OCXs only
CREATEOBJECT()	DIM AS New
CTOBIN()	No equivalent
CURSORGETPROP()	No equivalent
CURSORSETPROP()	No equivalent
CURVAL()	Now
DATE()	Now
DATETIME()	Now
DAY()	Same
DBC()	No equivalent
DBF() (return name of selected .DBF)	RecordSet Object Property
DBGETPROP()	Data Object Property
DBSETPROP()	Set Data Object Property
DBUSED()	No equivalent
DDE functions	Various
DEACTIVATE MENU	Use VB menu with 0 property
DEACTIVATE POPUP	Use VB menu with 0 property
DEACTIVATE WINDOW	AppActivate - AppDeactivate?
DEBUG	Set breakpoint(s) in IDE
DEBUGOUT	DEBUG.Print
DECLARE - DLL	Declare
DEFINE BAR	Use Menu Editor
DEFINE CLASS can be included in any PRG	Classes are files created in the IDE
DEFINE CLASS..ENDDEFINE	TYPE statement - user-defined types
DEFINE MENU applies to entire app	Menus are created within forms
DEFINE PAD	Use Menu Editor
DEFINE POPUP	Use Menu Editor
DELETE	RecordSet.Delete
DELETE - SQL	RecordSet Action Query

DELETE CONNECTION	Database Object Method
DELETE FILE	KILL
DELETE TAG	RecordSet Object Property
DELETE TRIGGER	RecordSet Object Property
DELETE VIEW	RecordSet Object Property
DELETED()	No equivalent
DESCENDING()	No equivalent
Destroy event	Terminate event
DIMENSION	Dim, ReDim [PRESERVE]
DIMENSION OR DECLARE	Dim, Redim
DIR	Dir - behaves differently
DIRECTORY()	Dir
DISKSPACE()	No equivalent
DISPLAY	No equivalent
DISPLAY < options >	No equivalent
DISPLAY DLLS	No equivalent
DISPLAY MEMORY	No equivalent
DISPLAY OBJECTS	No equivalent
DISPLAY PROCEDURES	No equivalent
DISPLAY STATUS	No equivalent
DISPLAY STRUCTURE	Traverse RecordSet object Fields coll
DISPLAY TABLES	Traverse Database object Tables coll
DISPLAY VIEWS	Traverse Database object QueryDefs coll
DMY()	Format() functions
DO CASE...ENDCASE	Different syntax
DO command	No equivalent
DO FORM	.Show
DO WHILE...ENDDO	Different syntax
DODEFAULT()	No equivalent
DOW()	FORMAT() function
DROP TABLE	Database Object Method
DROP VIEW	Database Object Method
DROPOFFLINE()	No equivalent
DTOC()	FORMAT() function
DTOR()	FORMAT() function

DTOS()	FORMAT() function
DTOT()	FORMAT() function
EDIT	No equivalent
EJECT()	No equivalent
EMPTY()	ISNULL(), ISEMPTY(), etc. type-specific
END TRANSACTION	Database Object Method
EOF()	RecordSet Object EOF Property
ERASE	KILL
ERROR command	Completely different error handling
ERROR()	Completely different error handling
EVALUATE()	No equivalent
EXIT	Exit
EXP()	Same
EXPORT	No equivalent
EXTERNAL	No equivalent
FCHSIZE()	No equivalent
FCLOSE()	CLOSE #
FCOUNT()	RecordSet Object property
FCREATE()	OPEN FOR OUTPUT
FDATE()	FileDateTime()
FEOF()	EOF(File#)
FERROR()	Completely different error handling
FFLUSH()	CLOSE # is similar
FGETS()	READ #
FIELD()	rs.FIELD(#).Name
FILE()	GetAttr()
FILTER()	No equivalent: RecordSet SELECT similar
FIND (obsolete)	SEEK
FKLABEL()	No equivalent
FKMAX()	No equivalent
FLOCK()	Recordset page locking is similar
FLOOR()	End Sub
FLUSH	No equivalent - rs.Update is similar
FONTMETRIC()	CommonDialog.ShowFont

FOPEN()	OPEN # AS
FOR EACH...ENDFOR	Same
FOR()	No equivalent
FOUND()	.NoMatch property of Recordset object
FPUTS()	PRINT #
FPUTS(), FWRITE()	Write #
FPUTS(), FWRITE()	Print # - display-formatted data
FREAD()	READ #
FREAD()	Input #
FREE TABLE	No equivalent
FSEEK()	Seek(#), Loc(#)
FSIZE()	GetAttr()
FTIME()	FileDateTime()
FULLPATH()	No equivalent
FUNCTION	Function declarations somewhat different
FUNCTION or PROCEDURE statement	SUB procedure declaration
FV()	No equivalent
FWRITE()	PRINT #
GATHER	No equivalent
GETBAR()	Not needed: VB menu items have events,
GETCOLOR()	CommonDialog component
GETCP()	RecordSet property
GETDIR()	CommonDialog component
GETENV()	No equivalent
GETEXPR	No equivalent
GETFILE()	CommonDialog component
GETFLDSTATE()	RecordSet Object property
GETFONT()	CommonDialog component
GETNEXTMODIFIED()	No equivalent
GETOBJECT()	Dim New
GETPAD()	Not needed: VB menu items have events,
GETPEM()	No equivalent for most features
GETPICT()	CommonDialog component

GETPRINTER()	CommonDialog component
GO	Bookmarking is similar
GOMONTH()	Write your own
Grid base class - fewer features & props	DBGrid - very powerful and complex
HEADER()	N/A
HELP	object.HelpFile = [filename]
HIDE MENU	Visible property of each menu item
HIDE POPUP	.Visible = False
HIDE WINDOW	.Hide
HOME()	AppDir()
HOUR()	Format()
IF Value = DisplayValue, entry matched	MatchedWithList (DBCombo or DBList)
IF...ENDIF	Different syntax
IIF()	Iff()
IIF() is similar but more verbose	Choose()
ImageList - almost never used	ImageList - widely used
ImageList control - used sparingly	ImageList control - used extensively
IMPORT	No equivalent
IN (list)	IN (list)
INDBC()	No equivalent
INDEX	RecordSet method
INKEY()	No equivalent
INLIST()	No equivalent
INPUT	InputBox is similar
INSERT	RecordSet SQL method
INSMODE()	Use SendKeys() to set
ISALPHA()	No equivalent
ISBLANK()	IsEmpty() or "" = Expr
ISDIGIT()	IsNumeric() is similar
ISEXCLUSIVE()	RecordSet Object property
ISFLOCKED()	RecordSet Object property
ISLEADBYTE()	No equivalent
ISLOWER()	Compare Lcase(expr) to (expr)
ISNULL()	Same

ISREADONLY()	RecordSet Object property
ISRLOCKED()	RecordSet Object property
ISUPPER()	Compare Ucase(expr) to (expr)
JOIN	Use SQL JOIN
MAPI ocx	MAPI control - 54 entries in HELP
MSCOMM ocx	MSComm object has 38 entries in HELP
Multimedia ocx	Multimedia obj - 60 entries in HELP
KEY()	No equivalent; rs Index collectn similar
KEYBOARD	Use SendKeys() to set
KEYMATCH()	Like SEEK, but doesn't move rec pointer
LABEL	Report writer also used for labels
LASTKEY()	No equivalent
LEFT(). LEFTC()	Left() is same;
LEN()	Same
Like EMPTY(), but for uninitialized vars	IsEmpty()
Like FoxPro Import,Export	Import - VisData
TableUpdate() with buffermode 3	UpdateRecord
LIKE(), LIKEC()	Like operator
LINENO()	No equivalent; Breakpoints replace
LIST	No equivalent
LIST CONNECTIONS	No equivalent; traverse connections obj
LIST DATABASE	Traverse collections in db object
LIST DLLS	No equivalent
LIST OBJECTS	No equivalent
LIST PROCEDURES	No equivalent
LIST TABLES	Traverse DataBase TABLES collection
LIST VIEWS	Traverse DataBase TABLES collection
ListBox and ComBox properties	DBList and DBCombo constants
LOADPICTURE()	Like GetData() from clipboard
LOCAL	No equivalent; use Public or Private
Local has same scope, but no persistence	Static
LOCATE	FindFirst
LOCFILE()	CommonDialog component

LOCK()	Use RecordSet object methods
LOG()	Same
LOG10()	Write your own: $\text{Log10} = \text{Log}(X) / \text{Log}(10)$
LOOKUP()	No equivalent
LOWER()	LCASE()
LPARAMETERS()	Function parameters are similar
LTRIM()	Same
LUPDATE()	No equivalent
MAX()	Same
MD	MkDir
MDOWN()	Use MouseDown event of Form
MDX()	No equivalent
MDY()	Format() function is similar
MEMLINES()	No equivalent
MEMORY()	No equivalent
MESSAGE()	Use error collection for messages
MESSAGEBOX()	MsgBox
MIN()	Same
MINUTE()	Timer is similar
MLINE()	No equivalent
MOD()	Same
Modal (screen)	WindowName.Show 1
MODIFY CLASS	IDE Class Editor
MODIFY COMMAND	SHELL NotePad is similar
MODIFY CONNECTION	Visual editor - no equivalent
MODIFY DATABASE	Visual editor - no equivalent
MODIFY FILE	SHELL NotePad is similar
MODIFY FORM	IDE Form Editor
MODIFY GENERAL	Visual editor - no equivalent
MODIFY LABEL	Visual editor - no equivalent
MODIFY MEMO	SHELL NotePad is similar
MODIFY MENU	Use Form Menu Editor
MODIFY PROCEDURE	IDE Module Editor
MODIFY PROJECT	Menu - Open Project
	Query definition within Data

MODIFY QUERY	Environment
MODIFY REPORT	IDE Report Designer
MODIFY SCREEN	IDE Form Editor
MODIFY STRUCTURE	No equivalent; use TableDef
MODIFY VIEW	No equivalent; Use QueryDef
MODIFY WINDOW	No equivalent
MONTH()	Same
MOUSE command	No equivalent - used for demos
MRKBAR()	Not used - VB menu is obj oriented
MRKPAD()	Not used - VB menu is obj oriented
MROW()	Used to simulate event model; not needed
MTON()	Format(),
MWINDOW()	Use Form.MouseOver event to trap
N/A	UnattendedApp property
NDX()	RecordSet manages indexes
No equivalent	PrintForm
No equivalent	LIKE operator
No equivalent	GetFormat
No equivalent	LoadResData
No equivalent	LoadResString
No equivalent	LoadResPicture
No equivalent	About
No equivalent	Button.Customize
No equivalent	RemoveAddInFromToolbar
No equivalent	ButtonHeight, ButtonWidth
No equivalent	IManageReposTypeLib
No equivalent	IMdoComponent
No equivalent	IMdoControl
No equivalent	IMdoControlContainer
No equivalent	IMdoControlUsage
No equivalent	IMdoISVControl
No equivalent	IMdoModelItem
No equivalent	IMdoProject
No equivalent	IMdoReference
No equivalent	Implements

No equivalent	IMpoProjectItem
No equivalent	IMpoProjectItemContainer
No equivalent	Import - add component to project
No equivalent	BOFACTION property
No equivalent	Bookmark in IDE code editor
No equivalent	VisibleItems property
No equivalent	SelectedItem
No equivalent	DataObject
No equivalent	DataObjectFiles
No equivalent	DateValue (almost anything)
No equivalent	DDB() function - Dbl Declining Balance
No equivalent	HEX(), OCT()
No equivalent	HitText of List objects
No equivalent in VFP 5.0	Repository
No Equivalent	LogPath, LogEvent
GoTo (Line # or label) not supported	GoTo
No equivalent	Lock, Unlock for sequential file I/O
No equivalent	IsArray()
No equivalent	Def Type statements
No equivalent	StatusBar control
No equivalent	Width # (File output)
VFP events are exposed by default	WithEvents
No equivalent	PropertyBag
No equivalent	.Printform
No equivalent	.ShowIntaskBar
No equivalent - use MousePointer	MouseIcon - set custom cursor
No equivalent - write your own	DateSerial
No equivalent; used for OLE operations	DataText
NOTE	Single quote (begins a comment)
NTOM()	Ccur()
NUMLOCK()	SendKeys()
NVL()	No equivalent
Use obj.ListIndex,TopIndex to write your own	Scroll event (lists, combos)

object.IncrementalSearch = .T./F.	object.MatchEntry (DBList/DBCombo)
object.Picture =	GetData (object method)
object.Picture =	SetData (object method)
object.Picture property	object.PaintPicture
OBJNUM()	Traverse container objects
OBJTOCLIENT()	Write your own
OBJVAR()	Traverse container objects
OCCURS()	Use Instr()
OCX Verb = 1, 2, etc. to call OCX function	Same
OLDVAL() - used with CURVAL()	No equivalent
OLE HELP entries - 27	OLE HELP entries - 30
ON ERROR	VB uses ON ERROR GOTO label
ON ESCAPE	Set form KeyPreview to True, then trap in KeyPress ev
ON SELECTION	Not used - VB menu is obj oriented
ON SHUTDOWN	No equivalent
ON() (to interrogate state of SET commands)	No equivalent
OPEN DATABASE	OpenDatabase(name) `
ORDER()	Use Index collection of recordset object
OS()	No equivalent
PACK	No equivalent
PACK DATABASE	No equivalent
PAD()	Use form menu click event code
PADL(), PADR(), PADC()	Write your own
PARAMETERS	Same
PARAMETERS()	FUNCTION statement contains params
PARAMETERS()	IsMissing() is similar
PAYMENT()	Pmt()
PCOUNT()	For missing parameters, use IsMissing()
PEMSTATUS()	No equivalent
Picture property	Picture object
PLAY MACRO	No equivalent; use MSSCRIPT.OCX
Prefix of fieldname in	DataSource

ControlSource	
PRIMARY()	No equivalent
PRIVATE	Used differently
Private, Public	Private, Public
Procedures stored in DBC	Procedure - stored procedures
PROGRAM()	No equivalent
PROPER()	StrConv (String, 3)
PUTFILE()	CommonDialog component
QUIT	End (or Unload Me in MDI form)
QUIT	object.QUIT
RAND()	Rnd - precede by Randomize
RAT(), RATC()	Write your own
RATLINE()	Write your own
RD	RmDkr
READ EVENTS	Default state of a VB app
READKEY()	No equivalent
RECCOUNT()	RecordSet property AFTER MoveLast
RECNO()	No Equivalent
RECSIZE()	No Equivalent
Refresh method	UpdateControls method
REFRESH()	RecordSet method?
REINDEX	No Equivalent
RELATION()	No Equivalent
RELEASE	No equivalent
RELEASE	N/A
RELEASE CLASSLIB	No Equivalent
RELEASE LIBRARY	No equivalent
RELEASE MENUS	N/A
Release method	Unload method
REMOVE CLASS	No equivalent
REMOVE TABLE	DataBase object method
RENAME	Name AS
RENAME CLASS	N/A
RENAME CONNECTION	N/A
RENAME TABLE	N/A
RENAME VIEW	N/A

REPLACE	rs.Edit: rs![Field]=: rs.update
REPLACE FROM ARRAY	No Equivalent
REPLICATE()	String()
REPORT	DataReportName.Go
Requery (ListBox, ComboBox)	Refill (ListBox, ComboBox)
REQUERY()	Requery method of QueryDef
RESTORE	N/A
RESUME	Press F8 in IDE when breakpointed
RETRY	No equivalent
RETURN	Same
RGB()	Same, but not always used the same way
RIGHT(), RIGHTC()	Same
RLOCK()	No equivalent; Access locks by page
ROLLBACK	RecordSet Object Method
ROUND()	No equivalent
RowSource	object.DataField
RTOD()	Write your own
RTRIM()	Rtrim()
RUN	Shell
Verb = (used with OLE objects)	Verb = (used with OLE objects)
SAVE MACROS	No equivalent
SAVEPICTURE()	CommonDialog
SCAN...ENDSCAN	Use rs.MoveNext until RS.eof
SCATTER	No equivalent
SCHEME()	No equivalent
SEC()	Same
SECONDS()	Timer is similar
SEEK, SEEK()	RecordSet Object FIND (Tables only)
SELECT 0	FreeFile (for file I/O)
SET	No equivalent
SET ALTERNATE	No equivalent; Use PRINT #
SET ASSERTS	No equivalent - PRINT.Assert
SET AUTOSAVE	No equivalent
SET BELL	No equivalent
SET BLOCKSIZE	No equivalent

SET CARRY	No equivalent
SET CENTURY	No equivalent
SET CLASSLIB	Classes added to project in IDE
SET CLOCK	No equivalent
SET COLLATE	RecordSet object property
SET CONFIRM	No equivalent
SET CONSOLE	N/A
SET COVERAGE	No equivalent
SET CPCOMPILE	RecordSet Object Property
SET CPDIALOG	No equivalent
SET CURRENCY	No equivalent
SET CURSOR	.MousePointer property
SET DATABASE	No equivalent
SET DATASESSION	No equivalent
SET DATE	No equivalent
SET DEBUG	Breakpoint setting in IDE
SET DEBUGOUT	No equivalent
SET DEVELOPMENT	No equivalent
SET DOHISTORY	No equivalent
SET ESCAPE	No equivalent
SET EVENTLIST	No equivalent
SET EVENTTRACKING	No equivalent
SET EXACT	Parameter of RecordSet FIND method
SET EXCLUSIVE	RecordSet Object Property
SET FDOW	No equivalent
SET FDOW, SET FWEEK, WEEK()	DatePart
SET FIELDS	No equivalent
SET FILTER	QueryDef object defines views
SET FULLPATH	N/A
SET FUNCTION	Function key mapping
SET FWEEK	No equivalent
SET HEADINGS	No equivalent
SET HELP	Bind in a HLP file
SET HELPFILTER	No equivalent
SET HOURS	No equivalent

SET INDEX	RecordSet object method
SET LIBRARY	Project attachment in IDE
SET LOCK	No equivalent
SET MARK	Menu object properties
SET MEMOWIDTH	No equivalent
SET NEAR	Parameter of RecordSet FIND method
SET NOCPTRANS	No equivalent
SET NOTIFY	No equivalent
SET NULL	RecordSet object property?
SET NULLDISPLAY	Form.Format - 4th parameter
SET ODOMETER	No equivalent
SET OLEOBJECT	Reference must be resolved in project
SET OPTIMIZE	No equivalent
SET ORDER	RecordSet object method
SET PATH	Dataset object must fully qualify
SET POINT	No equivalent
SET PRINTER	CommonDialog
SET PROCEDURE	References must be resolved in IDE
SET REFRESH	No equivalent
SET RELATION	RecordSet method
SET REPROCESS	No equivalent
SET RESOURCE	Use .INI file and write your own code
SET SAFETY	No equivalent
SET SECONDS	No equivalent
SET SKIP	N/A - use form with FlexGrid
SET SPACE	N/A
SET STATUS BAR	object.StatusBarText property
SET STEP	Breakpoint setting in IDE
SET SYSFORMATS	No equivalent
SET SYSMENU	No equivalent
SET TALK	No equivalent
SET TEXTMERGE	No equivalent
SET TOPIC	No equivalent
SET TRBETWEEN	No equivalent
SET UDFPARMS; @ before ByRef vars	ByVal, ByRef

SET UNIQUE	RecordSet indexing parameter
SET WINDOW OF MEMO	No equivalent - use SHELL NotePad
SET()	No equivalent
SETFLDSTATE()	No equiv - RecordSetEdit method 4record
SIGN()	Same
Similar to LTRIM()	LSET()
Similar to RTRIM()	RSET()
SIN()	Same
SKIP n	RecordSet.Move n; can be relative to bookmark
SORT	No equivalent
SOUNDEX()	No equivalent
SPACE()	Space() Space\$()
SQL	Syntax different, e.g. Table! [Fieldname]
SQLCANCEL()	RecordSet or QueryDef method
SQLCOLUMNS()	Data Object method parameters
SQLCOMMIT()	Data Object method
SQLCONNECT()	Data Object method
SQLDISCONNECT()	Data Object method
SQLEXEC()	Data Object method
SQLGETPROP()	Data Object method
SQLMORERESULTS()	Data Object method
SQLPREPARE()	Data Object method
SQLROLLBACK()	Data Object method
SQLSETPROP()	Data Object method
SQLSTRINGCONNECT()	Data Object method
SQLTABLES()	Data Object method
SQRT()	Same
STORE	varName = rs![Field]
STR()	Different syntax
STRCONV()	Same, slightly different syntax
STRTRAN()	Write your own
STUFF()	MID()
STUFF(), STUFFC()	Write your own

SUBSTR()	MID\$()
Date2 - Date1 gives difference in days	DateDiff (date1, Date2)
SUM	No equivalent
SUSPEND	Breakpoint set in IDE
SYS() functions (many)	Calls to Windows API
SYSMETRIC()	Various
TableRevert()	RecordSet object method
TableUpdate()	RecordSet object method
TAG()	RecordSet object index property
TAGCOUNT()	RecordSet object index property
TAGNO()	RecordSet object index property
TAN()	Same
TARGET()	RecordSet object Relation property
TEXT...ENDTEXT	' (on each individual comment line)
THISFORM	Me
THISFORMSET	No equivalent
TIME()	Time
Toolbar.AddObject method	Button Add method
TOTAL	No equivalent
TRANSFORM()	Format(), C* functions, others
TRIM()	Same
TTOC()	Format(), C* functions, others
TTOD()	Format(), C* functions, others
TXNLEVEL()	RecordSet object controls
TXTWIDTH()	CommonDialog?
TYPE ("") = "U/O/N/D/L"	IsNumeric, IsDate, IsBoolean, others
UNLOCK	RecordSet object method - Update/Revert
UPDATE - SQL	Executed in RecordSet object
UPPER()	UCase()
UPPER(), LOWER(), PROPER()	StrConv() function with different parameters
USE	Database / RecordSet object definition
? INKEY(0) to see ASCII() value of keystrokes	KeyCodeConstants
Use DO WHILE...ENDDO	WHILE...WEND

USE statement	Action Queries
USED()	No equivalent
VAL()	Same
VALIDATE DATABASE	No equivalent
GetFont(), GetDir(), GetFile(), GetPrinter()	CommonDialog control
VERSION()	Various App collection properties
VFP Valid event is different from VB	Validate event
WAIT	Use MsgBox instead
WEEK()	DatePart()
WEXIST()	Iterate through app windows collection
WFONT()	Form.FontName
WITH...ENDWITH	Same
WTITLE()	Iterate through app windows collection
YEAR()	Same
ZAP	No equivalent
ZOOM WINDOW	Individual window properties
\\ \\ TextMerge print command	PRINT # (sort of...)
_Screen.Height	app.WorkAreaHeight
